

SpendWise

User Guide

Enterprise procurement platform for requests, approvals, sourcing, purchase orders, invoices, contracts, and AI-assisted workflows.

Version 1.0 • August 2026

1. Getting Started

SpendWise is a multi-tenant SaaS platform. Each organisation has its own workspace with isolated data, subscription plan, and team members.

Web app: <http://localhost:3000> (or your deployed URL)

API docs: <http://localhost:3001/docs>

1. Visit the marketing site and click Start free trial, or go directly to /register.
2. Create an account with your name, email, password, and organisation name.
3. Verify your email if prompted, then sign in at /login.
4. Complete the onboarding wizard at Dashboard -> Onboarding (organisation admins).
5. Invite team members from Dashboard -> Organization -> Invitations.

2. User Roles

Navigation and permissions depend on your role within the organisation:

Role	Typical access
Admin	Full access, billing, organisation settings, member management
Procurement Manager	Procurement, RFQs, bids, vendors, POs, analytics
Finance	Approvals, invoices, contracts, analytics, bids
Department Head	Submit requests, approve at department level, RFQs
User	Create procurement requests, goods receipts, contracts (read)

3. Dashboard

The dashboard shows KPIs, recent activity, quick actions, and navigation. Your menu only shows modules your role can access.

- Dashboard - overview and quick links
- Procurement - create and track purchase requests
- Approvals - review pending approval steps
- Analytics - spend and operational metrics (Professional plan)
- AI Assistant - chat, spend analysis, contract summaries (Enterprise)

4. Procurement Workflow

End-to-end procure-to-pay flow:

1. Create a procurement request (Dashboard -> Procurement) with budget, items, and delivery date.
2. Submit the request for approval. An approval workflow is created.
3. Approvers act in Dashboard -> Approvals (approve or reject).
4. After approval, create RFQs and invite vendors (Starter plan).
5. Collect and evaluate bids, then award a vendor.
6. Issue a purchase order and send it to the vendor.
7. Record goods receipt when items arrive.

- 8. Match and process vendor invoices.
- 9. Manage contracts for ongoing supplier agreements.

5. Key Modules

- Vendors - maintain supplier records, contacts, and risk information.
- RFQs - publish requests for quotation and track vendor responses.
- Bids - compare vendor proposals and run evaluations.
- Purchase Orders - issue, edit, and track PO status.
- Goods Receipts - confirm delivery and reject damaged shipments.
- Invoices - three-way matching and payment tracking.
- Contracts - lifecycle management with versions and documents.

6. Organization & Team

Organisation admins manage the tenant workspace:

- Organization -> Profile - update organisation name and details.
- Organization -> Members - view team and update roles.
- Organization -> Invitations - invite users by email with assigned roles.
- Organization -> Roles - reference for role capabilities.
- Organization -> Settings - organisation preferences.
- Settings - personal profile, security, notifications, audit logs.

7. Billing & Subscription

Organisation admins manage subscription at Dashboard -> Billing. Every new organisation starts with a 14-day trial.

Plan	Highlights
Free	3 users, 25 requests, core procurement
Starter	RFQs, bids, purchase orders - NGN 75,000/mo
Professional	Full P2P, AI, analytics, vendor portal - NGN 225,000/mo
Enterprise	Unlimited scale, SSO, API access - contact sales

- View current plan, trial end date, and usage meters on the Billing page
- Upgrade via Paystack checkout (requires Paystack configuration)
- Cancel subscriptions from Dashboard -> Billing.

8. Support & Help

- Dashboard -> Support - open support tickets for billing or other issues
- Marketing site -> Contact - reach sales for Enterprise plan
- Documentation site - <http://localhost:3002> (SaaS, billing, contracts)
- In-app onboarding wizard - step-by-step setup for new tenants

9. Vendor Portal

Vendors access a separate portal at /vendor/login using credentials linked to their vendor record.

- View invited RFQs and submit bids.
- Acknowledge purchase orders.
- Submit and track invoices.
- View contracts and use the vendor AI assistant.

10. Mobile App

The Expo mobile app provides dashboard, approvals, purchase orders, invoices, contracts, vendor portal, and AI chat with offline sync.

- Set EXPO_PUBLIC_API_URL to your API base URL.
- Run: pnpm --filter mobile start
- Sign in with the same credentials as the web app.

11. Demo Accounts (after seed)

Role	Email	Password
Admin	admin@demo.com	Password123!
Finance	finance@demo.com	Password123!
Procurement Manager	procurement@demo.com	Password123!
Department Head	depthead@demo.com	Password123!
User	vendor@demo.com	Password123!

12. Tips & Best Practices

- Use clear procurement titles and justification
- Keep vendor records up to date before purchase
- Check usage limits on the Billing page before
- Enable email verification and strong passwords
- Platform admins can access Dashboard

For technical deployment and API reference, see docs on the [Github](#) repository.
